New Service Existing Service

Commercial:

- Building over three (3) stories in height.
- Treated Water (Chemicals added to water for heating, cooling or irrigation).
- Irrigation system for landscaping or dedicated water meter for that purpose.
- Chemical processing or repackaging (Operation using chemicals).
- Cold Storage (Freezer room or cooler).
- Dental office.
- Irrigation Well (Well used to water plants or crops).
- Medical office or Medical treatment.
- Sewage ejector (pumping of sewage to the public sewer main).
- Drink Dispenser using a carbonator (soft drinks, not in a can or bottle).
- Steam generating (steam boiler, autoclave or steam producing equipment).
- Recycled water (equipment using the same water more than once).
- Reclaimed water (treated water from the sewage treatment plant).
- Waste interceptor (grease receptor/trap, etc.).
- Water for decorative use (a pool, fountain, stream, etc.).
- Water make-up (replacement water to equipment due to evaporation or use).
- Water pumping other than a hot water re-circulation.
- Water-cooled equipment (water circulated through water equipment jackets).
- Grey water reclamation system.
- Fire service (service for a fire hydrant or building sprinkler system).
- Booster pump (pump to increase the water pressure).
- Domestic well (well water used for consumption).
- Multi-service connection (more than one water service to the property).
- Building or equipment is 20 feet above the service connection.
- Swimming pool or Spa.
- None of the above

Residential:

- Grey water reclamation system.
- Fire service (service for a fire hydrant or building sprinkler system).
- Booster pump (pump to increase the water pressure).
- Domestic well (well water used for consumption).
- Irrigation system for landscaping or dedicated water meter for that purpose.
- Multi-service connection (more than one water service to the property).
- Building or equipment is 20 feet above the service connection.
- Swimming pool or Spa.
- None of the above.

For Official Use Only

Degree of Hazard

- No Hazard at this time
- Non-Health Hazard (Pollution)
- Health Hazard (Contaminant)
- Sewage

Type of Device Required

- Air Gap
- Reduced Pressure Principal Detector Assembly (RPDA)
- Reduced Pressure Principal Assembly (RP)
- Double Detector Check Assembly (DCDA)
- Double Check (DC)
- None

Description of Hazard

Ordinance No. 73

An Ordinance of the Hi-Desert Water District establishing rules and regulations for providing water service and rescinding Ordinance 71.

Section 9. Cross-Connection Control

9.01 Cross-Connections – The purpose of this section is to protect the public potable water supply system of the Hi-Desert Water District by establishing a Cross-Connection Control Program to affect the control of connections, actual or potential, thereby isolating within the customer's private water system or internal piping, contaminate or pollutants which could backflow or back siphon into the District's water supply system.

The regulations relating to cross-connection as established in the California Code of Regulations, Title 17 and as amended from time to time, insofar as these regulations are applicable to the protection of water supply of these District are hereby adopted, incorporated herein by reference and made a part hereof.
